User document usually include:

1. **Hardware Requirements:**
   - Processor - i3
   - Hard Disk - 5GB
   - Memory - 1GB RAM

2. **Software Requirements:**
   - Windows 10
   - CodeBlocks

3. **How to Use Different Features of the System:**
   - First, the user needs to add a task. For this you have to press option 1 of the main menu page. So first you have to input today's date. User have to input how many tasks he wants to assign. You have to mention the specific time and name of the task for each task. Then the user can go to the main menu if he wants.

   - Second, the user can see the assigned tasks by going to the view all task option. For that he has to press option 2 of main menu page.

   - Thirdly, if the user wants, he can delete the assigned task at his own will. For that, you have to press option 3 of the main menu page. By inputting the task number, the user can delete any task.

   - Fourthly, every task added by the user has to be activated by pressing option 7 on the main menu page.

   - Fifth, if the user wants to keep track of his daily expense, he has to press option 4 of the main menu page. By giving input amount and expense purpose input, he will be able to add his daily expense.

   - Sixth, if user want to see daily, weekly, monthly expense, he has to press option 5 of the main menu page. There, by pressing any option of daily expense, weekly expense, monthly expense, user can see the total daily, weekly, monthly expenses respectively.

- Lastly, the user can exit the system by pressing option 6 on the main menu page.
